OIML Weight Sets

OIML weight sets include a complete group of test weights that can meet requirements for testing to OIML standards. E1 and E2 weight sets provide a high level of accuracy and are ideal for calibrating analytical and precision balances. M1 weight sets offer a lower level of accuracy, but are affordable and ideal for calibrating compact portable balances and bench scales.

Stainless steel weight sets for calibration that meets testing requirements and standards

Features

- Rugged stainless steel construction for ultimate durability
- White cotton gloves included to aid in moving weights
- Brush and wipe cloth included for cleaning weights effectively
- Tweezer included to make placing and removing easier
- Class E2 feature 7.96 g/cm3 density, classes E1, F1 & M1 feature 7.9 g/cm3
- Available in classes F1, E2, M1 and E1 for specific precision requirements
- A 1-year warranty means quality assured for years of use.

Applications

Adam is the answer.

For more than half a century, Adam has been the answer when accuracy is the priority. Adam scales and balances provide precision solutions for professionals in every industry.
